# Business Units & IT

The numerous facets of the requirements placed on electronic data processing by the business departments constantly pose new challenges for corporate IT. Innovations in software and hardware offer enormous opportunities to optimize business and IT processes.

We support you in your business area with our versatile IT knowledge and experience from more than 20 years.

Righley Cooper GmbH

KI - Technologie

# Robotic Process Automation

For the automation of business and technical processes, processes are analyzed, documented and optimized, followed by the design and development in BluePrism or UIPath.

Within that the robot-user learns to run the processes from the first to the last work step and thus completes business or technical tasks on a PC, workstation or virtual computer across software by himself.

We will be happy to inform and advise you

Righley Cooper GmbH

# In-House training

Within the framework of personal development, training is an important measure for the further training of internal employees.

Thus, we offer you the efficient integration of employees for new or specific tasks within your team.

We offer these in-house on-the-job in the following areas

MS Office

Business Analysis

Projectmanagement

Robot Process Automation

SQL, Databases
